Top box elements AEV / AEVE / AEVST

09/2005

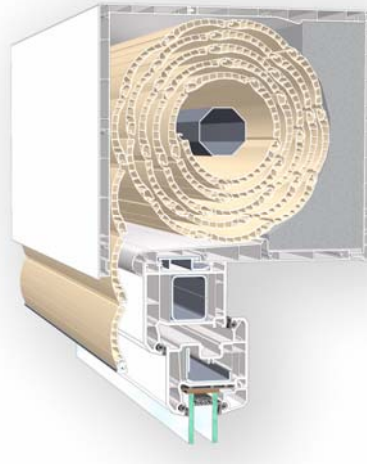

technical description

	<p>box exterior faceplate out of PVC. Top, opening and bottom are made of PVC. PVC side bearings with securing metal taps. Appeal opening inside. SW 40 mm octagonal steel shafts with guiding discs for cord on both sides. SW 60 mm shafts for wider components.</p> <p>insulation hard foamed insulation standard u-value = 1,1 W/m²K, special insulation u-value = 0,82 W/m²K or noise protection on request (box size 180 and 210), (notice reduced maximum heights because of noise protection)</p>
	<p>guiding rails: shutter railings are made of extruded PVC or compressed aluminium with rubber sealing which matches the type and colour of the whole component.</p>
	<p>shutter covers: Heinzmann PVC design P 700 Heinzmann PVC design P 1452 Heinzmann aluminium design C 838, with polyurethane insulation foam core. Heinzmann aluminium design C 1453, with polyurethane insulation foam core. Heinzmann aluminium design CS 838, compressed</p>
	<p>end slat: coloured in line with shutter container. Comes with sliders, fully retractable into container.</p>
	<p>use: with cord, crank-handle or electrical powering.</p>
	<p>security: automatic locking with shutter springs which protect against damage. Heinzmann-Siklett shutter security system is available for surcharge.</p>
	<p>fixing connection profile for VEKA-windows, alternatively for all bigger profile systems and wooden windows available.</p>

Product information

Top box elements AEV / AEVE / AEVST

09/2005

systems:

AEV

Top box element, exterior faceplate and guiding rails extruded white or covered brown, nutbrown, mahogany or chestnut coloured plastic. Other parts are generally extruded white or plasticised brown or wooden decor.

AEVST

Top box element, additional exterior face plate and guiding rails are made of compressed aluminium, anoded (E6EV1) or varnished white. Special colours (RAL) available for surcharge. Other parts are generally extruded white or plasticised brown or wooden decor.

AEVE

Top box element, additional plasterwork faceplate, exterior faceplate and guiding rails extruded white or covered brown, nutbrown, mahogany or chestnut coloured plastic. Other parts are generally extruded white or plasticised brown or wooden decor.

top box elements (height incl. box in mm)				
box size	P 700	C 838	P 1452	C 1453
140 SW 40 motor up to 18 kg	1150	1150	-	-
140 SW 60 motor up to 59 kg	0930	0930	-	-
160 SW 40 motor up to 18 kg	2040	2040	-	-
160 SW 40 motor up to 59 kg	1840	1840	-	-
180 SW 40	2690	2690	-	-
180 SW 60 motor up to 59 kg	2290	2290	1700	1460
210 SW 40	-	-	-	-
210 SW 60 motor up to 59 kg	-	3000	2280	2340

attention:

Top box elements with with length over 2500 mm needs a strengthend bottom, which reduce the maximum heights. P 1452 only available up to 2500 mm.
